

**LIST OF REQUIREMENTS FOR WORKSHOP  
WITH NICOLA DAVIES-MURRAY  
ON 11<sup>TH</sup> OCTOBER, 2018 from 1.30 pm – 3.30 pm PRICE £20**

**FLORAL FAN (A HAND TIED FRAMEWORK FOR A BOUQUET)**

10 x Straightish flexible twigs, approximately 5 mm diameter, e.g. Cornus, Willow, or similar. They need to bend as they are going to form a crescent shape.

1 x thicker twig for the bottom (or you could use 3 more of the first type).

**Cable ties Club will supply**

**4 x 1.8mm diameter x 500 mm length stub wires. Club will supply**

**Parafilm or Stemtex tape (to cover wire). Club will supply**

**Oasis tape or pot tape. Club will supply**

Secateurs, snips or scissors, long nose pliers to nip wires together. We would prefer you to bring your own but we will have a few secateurs or scissors as a back up.

**Long stemmed flowers e.g.** Lilies and Alstroemerias; lilies and soft birch stems; Gladioli and stocks; big Campanula and Nigella; Clematis and Kangaroo Paw.

You are trying to get a combination including one that's "fluffy" to fill the gaps in the framework of twigs.

Roses and big Carnations say, would not be good as they would be too "blobby".
